THE

AMERICAN

JOURNAL OF SCIENCE.

EDITORS

JAMES D. AND EDWARD S. DANA.

ASSOCIATE EDITORS

PROFESSORS GEORGE L. GOODALE AND JOHN TROWBRIDGE, OF CAMBRIDGE.

PROFESSORS H. A. NEWTON, A. E. VERRILL AND H. S. WILLIAMS, OF NEW HAVEN,

PROFESSOR GEORGE F. BARKER, OF PHILADELPHIA.

THIRD SERIES.

VOL. XLVIII—[WHOLE NUMBER, CXLVIII.]

Nos. 283—288.

JULY TO DECEMBER, 1894.

WITH XI PLATES.

PUBLIC LIBRARY,
DETROIT, MICH.
MAR 1895

NEW HAVEN, CONN.: J. D. & E. S. DANA.
1894.

THE TUTTLE, MOREHOUSE & TAYLOR PRESS, NEW HAVEN, CONN.

CONTENTS OF VOLUME XLVIII.

Number 283.

Page.

ART. I.—Spiral Goniometry in its Relation to the Measurement of Activity; by C. BARUS 1

II.—Occurrence of a large area of Nepheline Syenite in the Township of Dungannon, Ontario; by F. D. ADAMS... 10

III.—Nepheline, Sodalite and Orthoclase from the Nepheline Syenite of Dungannon, Ontario; by B. J. HARRINGTON 16

IV.—New Design for large Spectroscope Slits; by F. L. O. WADSWORTH. (With Plate I.) 19

V.—Tertiary Changes in the Drainage of Southwestern Virginia; by M. R. CAMPBELL 21

VI.—Methods for the Determination of Water; by S. L. PENFIELD 30

VII.—Detection of Alkaline Perchlorates associated with Chlorides, Chlorates, and Nitrates; by F. A. GOOCH and D. A. KREIDER 38

VIII.—Upper Vicksburg Eocene and the Chattahoochee Miocene of Southwest Georgia and adjacent Florida; by A. F. FOERSTE 41

IX.—Gabbros in the Southwestern Adirondack Region; by C. H. SMYTH, JR. 54

APPENDIX.—X.—Footprints of Vertebrates in the Coal Measures of Kansas; by O. C. MARSH. (With Plates II and III.) 81

XI.—Typical ORNITHOPODA of the American Jurassic; by O. C. MARSH. (With Plates IV–VII.) 85

XII.—Eastern Division of the Miohippus Beds with Notes on some of the Characteristic Fossils; by O. C. MARSH. 91

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Titration method for determining Molecular Mass? KÜSTER, 65.—Use of the Lummer-Brodhun prism in Colorimetry, KRÜSS: Electrolysis by Alternating Currents, HOPKINSON, WILSON and LYDALL, 66.—Source of the Hydrogen Peroxide in the Atmosphere, BACH: Explosive Haloid Compounds of Nitrogen, SELIWANOW, 67.—Preparation of Phosphorus by the Action of Aluminum upon the Phosphates, ROSSEL and FRANK: Production artificially of the Diamond, MOISSAN, 68.—Electrical Condition of the air in high altitudes, 69.

Geology and Mineralogy—United States Geological Survey, 70.—Introduction to the Study of the Brachiopoda, J. HALL and J. M. CLARKE, 71.—Bibliotheque Gèologique de la Russie, S. NITIKIN: Illustrations of the Fauna of the St. John Group, G. F. MATTHEW, 72.—Fossil resin, E. A. SMITH: Papers and Notes on the Glacial Geology of Great Britain and Ireland, H. C. LEWIS, 73.—Brief notes on some recently described minerals, 74.—Manuel de Mineralogie, A. DES CLOISEAUX, 75.

Astronomy—Total Eclipses of the Sun, M. L. TODD: Publications of the Lick Observatory of the University of California: Prof. M. Updegraff, 76.

Botany—Guide to Sowerby's Models of British Fungi in the Department of Botany, British Museum, 1893, 76.—Monograph of Lichens found in Britain, J. M. CROMBIE, 77.

Miscellaneous Scientific Intelligence—Condition of Kilauea, March 20th, 1892, F. S. DODGE: Leicester Earthquake of August 4, 1893, C. DAVISON, 78.—Congrès Geologique International, S. F. EMMONS, 79.—International Congress of applied Chemistry, 80.

Number 284.

Page.

ART. XIII.—Certain Astronomical Conditions favorable to Glaciation; by G. F. BECKER 95

XIV.—Mineralogical Notes; by S. L. PENFIELD 114

XV.—Development of the Lungs of Spiders; by O. L. SIMMONS. (With Plate VIII) 119

XVI.—Alunite, from Red Mountain, Ouray County, Colorado; by E. B. HURLBURT 130

XVII.—Geographic and Hypsometric Distribution of North American Viviparidæ; by R. E. CALL. (With Map.) 132

XVIII.—Mineralogical Notes; by S. L. PENFIELD and D. A. KREIDER 141

XIX.—Carboniferous Fossils in the Norfolk County Basin; by J. B. WOODWORTH 145

XX.—Determination of Ferrous Iron in Silicates; by J. H. PRATT 149

XXI.—Action of Reducing Agents on Iodic Acid; by C. F. ROBERTS 151

XXII.—The Stratigraphic Position of the Thomson Slates; by J. E. SPURR 159

XXIII.—The Generation of Chlorine for Laboratory Purposes; by F. A. GOOCH and D. A. KREIDER 166

APPENDIX.—XXIV.—Miocene Artiodactyles from the Eastern Miohippus Beds; by O. C. MARSH 175

SCIENTIFIC INTELLIGENCE.

Geology and Mineralogy—Geologic Atlas of the U. S., Montana, J. W. POWELL, Director, 170.—Relation of double refraction to Soda in Hornblende, A. C. LANE, 172.—New locality for Silurian Limestone in Northern Michigan, A. E. SEAMAN: Etude sur la détermination des Feldspaths dans les plaques minces, A. MICHEL LÉVY, 173.

Obituary—GEORGE HUNTINGTON WILLIAMS, 174.

Number 285.

Page.

ART. XXV.—Effect of Glaciation and of the Glacial Period on the present Fauna of North America; by S. H. SCUDDER 179

XXVI.—Constitution of the Zeolites; by F. W. CLARKE .. 187

XXVII.—Hemimorphic Wulfenite Crystals from New Mexico; by C. A. INGERSOLL 193

XXVIII.—Notes on the Tertiary and later History of the Island of Cuba; by R. T. HILL 196

XXIX.—Mineralogical Notes on Cerussite, Calamine and Zircon; by J. H. PRATT 212

XXX.—Reduction of Arsenic Acid by the Action of Hydrochloric Acid and Potassium Bromide; by F. A. GOOCH and I. K. PHELPS 216

XXXI.—Occurrence of Leadhillite in Missouri and its Chemical Composition; by L. V. PIRSSON and H. L. WELLS 219

XXXII.—Thermo-Electric Heights of Antimony and Bismuth Alloys; by C. C. HUTCHINS 226

XXXIII.—Magnitude of the Solar System; by W. HARKNESS 230

XXXIV.—Nitrogen Content of California Bitumen; by S. F. PECKHAM 250

XXXV.—Note on Artificial Crystals of Zinc Oxide; by H. RIES 256

APPENDIX.—XXXVI.—Description of Tertiary Artiodactyles; by O. C. MARSH 259

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Law and Theory in Chemistry, D. CARNEGIE, 257.

Astronomy—Treatise on Astronomical Spectroscopy, J. SCHEINER and E. B. FROST, 257.

Number 286.

Page.

ART. XXXVII.—An Auriferous Conglomerate of Jurassic Age from the Sierra Nevada; by W. LINDGREN 275

XXXVIII.—Antholite from Elzivir, Ontario; by A. P. COLEMAN 281

XXXIX.—Double Chlorides and Bromides of Cæsium, Rubidium, Potassium and Ammonium with Ferric Iron, with a description of two Ferro-ferric double Bromides; by P. T. WALDEN 283

XL.—The Standardization of Potassium permanganate in Iron Analysis; by CHARLOTTE F. ROBERTS 290

XLI.—Detection and Approximative Estimation of Minute Quantities of Arsenic in Copper; by F. A. GOOCH and H. P. MOSELEY 292

XLII.—Notes on the Miocene and Pliocene of Gay Head, Martha's Vineyard, Mass., and on the "Land phosphate" of the Ashley River district, S. C.; by W. H. DALL 296

XLIII.—Thermo-electric Properties of Platinoid and Manganine; by B. O. PEIRCE 302

XLIV.—Change of Period of Electrical Waves on Iron Wires; by J. TROWBRIDGE 307

XLV.—Wave lengths of Electricity on Iron Wires; by C. E. ST. JOHN. With Plate IX 311

XLVI.—Age of the Manganese beds of the Batesville Region of Arkansas; by H. S. WILLIAMS 325

XLVII.—Present Status of High Temperature Research; by C. BARUS. With Plate X 332

XLVIII.—Recent eruption in the Crater of Kilauea; by L. A. THURSTON 338

XLIX.—Solutions of Metallic Silver; by M. C. LEA 343

L.—Gigantic Bird from the Eocene of New Jersey; by O. C. MARSH 344

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—New Gaseous Constituent of the Atmosphere. RAYLEIGH: Die wissenschaftliche Grundlagen der analytischen Chemie, W. OSTWALD, 345.—Note on the telephonic measurement of electromotive force, C. BARUS: A Laboratory Manual of Physics and applied Electricity, E. L. NICHOLS, 346.

Geology and Mineralogy—Geological Society of America: New Miocene Tapir, O C. MARSH, 348.—Channels on Drumlins, G. H. BARTON, 349.—Trias and Jura of Shasta Co, Cal, J. P. SMITH: Carboniferous Strata of Shasta Co, Cal., J. P. SMITH: Anomalies in the growth of Alum Crystals, H. A. MIERS, 350.

Astronomy—Verzeichniss der Elemente der bisher berechneten Cometenbahnen, J. G. GALLS: Gesammelte Werke von Heinrich Hertz, Band III. 352.

Miscellaneous Scientific Intelligence—American Association for the Advancement of Science, 352.—British Association: University of Oxford, 353.

Obituary—JOSIAH PARSONS COOKE, 353.—BARON HERMAN LUDWIG FERDINAND VON HELMHOLTZ, 354.

Number 287.

Page.

ART. LI.—Variations and Mutations; by W. B. SCOTT 355

LII.—An Iodometric Method for the Estimation of Telluric Acid; by F. A. GOOCH and J. HOWLAND 375

LIII.—Resonance Analysis of Alternating Currents; by M. I. PUPIN 379

LIV.—Origin of Bitumens. A Retrospect; by S. F. PECKHAM 389

LV.—Simple Chronograph Pendulum; by C. BARUS..... 396

LVI.—New Methods of obtaining Platinochlorides. Probable Existence of a Platinum Subchloride; by M. C. LEA 397

LVII.—Study of the Cherts of Missouri; by E. O. HOVEY . 401

LVIII.—Qualitative Separation of Chromium from Iron and Aluminium; by R. B. RIGGS 409

LIX.—Copper Crystals in Aventurine Glass; by H. S. WASHINGTON 411

LX.—Cæsium-Cobalt and Cæsium-Nickel Double Chlorides, Bromides and Iodides; by G. F. CAMPBELL 418

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—Electric Conductivity of Gases, BRAUN: Connection between the Atomic masses of metals and the Crystallographic characters of their Isomorphous salts. TUTTON, 421.—Influence of Moisture on Chemical Change BAKER, 422.—Production of free Fluorine by Chemical means, BRAUNER, 423.—Structure of the Flame of Cyanogen, SMITHELLS and DENT, 424.—Select Methods in Chemical Analysis, CROOKES: Elementary Manual of Chemistry, F. H. STORER and W. B. LINDSAY, 425.—Movements of the Solar Atmosphere, M. H. DESLANDRES: Luminous effects produced by electric oscillation, H. EBERT: Resistance of Bismuth in strong magnetic fields, H. J. B. HENDERSON, 427.—Motion of dielectric bodies in a homogeneous electrostatic field, LE GRAETZ and L. FOMM: Maxim's flying machine, H. S. MAXIM: Treastise on the Measurement of Electrical Resistance, W. A. PRICE, 428.—Practical Work in General Physics, W. G. WOOLLCOMBE, 429.

Geology and Mineralogy—Occurrence of Anorthite and Epidote, F. W. CLARKE: New locality of true Emeralds, G. F. KUNZ, 429.—Physical Geology and Geography of Great Britain, by the late Sir Andrew C. Ramsay: Story of our Planet, T. G. BONNEY, 430.

Botany—Flora of Mt. Desert Island, Me., E. L. RAND and J. H. REDFIELD: Researches in regard to the respiration of Muscineæ, B. JÖNSSON: Constitution of the Atmosphere, T. L. PHIPSON, 431.

Astronomy and Mathematics—Collected Mathematical papers of Henry John Stephen Smith: Cordoba Durchmusterung Atlas, 432.

Miscellaneous Scientific Intelligence—Popular lectures and addresses, Sir W. THOMSON (BARON KELVIN): International Geological Congress, 433.—Chloride of mercury batteries, D. H. FITCH, 434.

Number 288.

Page.

ART. LXI.—Inversion of Temperatures in the 26·28 day Solar Magnetic Period; by F. H. BIGELOW 435

LXII.—Remarks on Colloidal Silver; by C. BARUS 451

LXIII.—Duration of Niagara Falls; by J. W. SPENCER ... 455

LXIV.—Resonance Analysis of Alternating Currents; by M. I. PUPIN. Part II 473

LXV.—Distribution and Probable Age of the Fossil Shells in the Drumlins of the Boston Basin; by W. O. CROSBY and H. O. BALLARD 486

LXVI.—Improved Form of Interrupter for large Induction Coils; by F. L. O. WADSWORTH 496

LXVII.—Post-Glacial Faults at St. John, N. B.; by G. F. MATTHEW. (With Plate XI) 501

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics—New Iodine Bases, V. MEYER and HARTMANN, 503.—Anomaly in the Density of Nitrogen, RAYLEIGH, 504.—Carbon Boride, MOISSAN, 505.—Carbides of Calcium, Barium and Strontium, MOISSAN: Size of the molecule of Mercurous chloride, V. MEYER and HARRIS, 506.—Text-book of Inorganic Chemistry, G. S. NEWTH: Elementary Chemistry, G. R. WHITE: The mean density of the Earth, POYNTING, 507.—Mean density of the Earth, E. D. PRESTON: Source of friction electricity, C. CHRISTIANSEN, 508.—Electrical conductivity of absolutely pure water, KOHLRAUSCH and HEYDEWEILER: Self induction and capacity of coils, C. FROMME: Spirals with compensated self induction, TESLA, 509.

Geology and Mineralogy—Pre-Olenellus fauna, Dr. F. NOETLING, 509.—Mineral Industry, its Statistics, Technology and Trade for 1893, 510.—Catalogue of Minerals, G. L. ENGLISH, 511.

Botany—Vegetable Resources of India, 511.—Grafting, M. L. DANIEL, 512.—Inflorescence in Descriptive Botany, M. F. HY: Researches on the Structure and affinities of Terebinthaceae, M. JADIN, 513.

Miscellaneous Scientific Intelligence—National Academy of Sciences, 513.

Obituary—WILLIAM TOPLEY, 514.
